

# ScrollWizard 1.0

A reading application for iPhone and iPad. SuperComfySoft produces it.

---

## Summary

---

ScrollWizard reads EPUB and PDF files on iOS. Version 1.0 includes per-book typography overrides, five-colour highlights with notes, annotation export to Markdown, Obsidian, Notion, Logseq, and JSON, a built-in dictionary with a saved-word list that exports to TSV, JSON, or a tab-separated flashcard file, full-text library search, OPDS catalog support, iCloud Drive sync, PDF theming, and reading statistics. Advanced Wizard Mode is a one-time \$4.99 upgrade adding an RSVP focus reader and a split reader.

SuperComfySoft does not operate a subscription service.

## Feature set

---

- Per-book typography overrides — font, size, line height, letter spacing, word spacing, margins, alignment, hyphenation
- Five-colour highlights with notes; export to Markdown, Obsidian, Notion, Logseq, JSON
- Smart collections with rule-based filtering; full-text library search
- Built-in dictionary -- tap to define, save to a personal list with the source book and surrounding sentence, export to TSV / JSON / a tab-separated flashcard file
- PDF theming (themed dark mode for PDFs, not just chrome)
- Custom themes
- Reading statistics — daily and weekly charts, annual goals
- OPDS catalog support — Project Gutenberg, Standard Ebooks, ManyBooks, Feedbooks, Calibre content servers
- iCloud Drive synchronisation to a folder visible to the user
- **Advanced Wizard Mode (\$4.99 once):** RSVP focus reader (100–1500 WPM); split reader (two books side by side on iPad with paragraph-proportional sync)

## What ScrollWizard does not do

---

MOBI, AZW3, and CBZ are not supported. Conversion is available through Calibre. SuperComfySoft will not be reimplementing Calibre.

## Continuity

---

ScrollWizard's continuity is a property of its data formats, not of its developer. Books are EPUBs in iCloud Drive. Annotations export to five formats. There is no proprietary database to escape from.
